

Navigating The Discovery

Nevada Stories

Explore Nevada's rich culture and storied history in The Discovery's largest gallery. Be sure to e-mail yourself a virtual postcard to commemorate your visit.

INSIDE OUT *an Anatomy Experience*

Dive deeper into the amazing ways our bodies work, grow, age and heal in this exciting gallery that will take you on a journey through human anatomy.

Build It!

Get hands-on with engineering, green energy, and seismic technology in this very interactive space. Be sure to build a catenary arch and a KEVA Plank tower.

THE SHOP

Hands-on gets serious in this robust tinkering space. Use real tools and materials to design and build the projects you've only imagined. *Use of tools and materials limited to staffed hours only, check nvdnm.org for more details.*

Da Vinci's Corner

Da Vinci would be right at home in this space where art and science intersect! Experiment with catapults, flying contraptions, refracted light, early movie-making technology, and much more! And, test your brain on one of this exhibition's Brain Teasers.

Spark!Lab Smithsonian

Explore the process of invention – from initial idea, to prototype, to marketing – and maybe even come up with the World's next big invention in this hands-on lab.

Little Discoveries (5 and under)

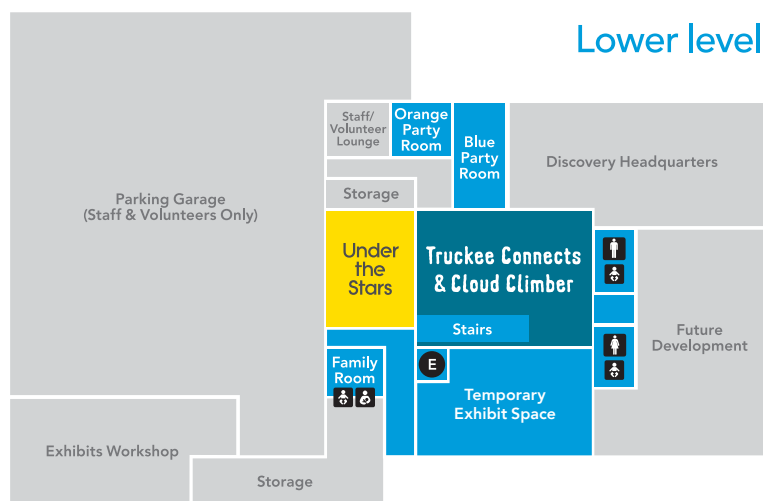

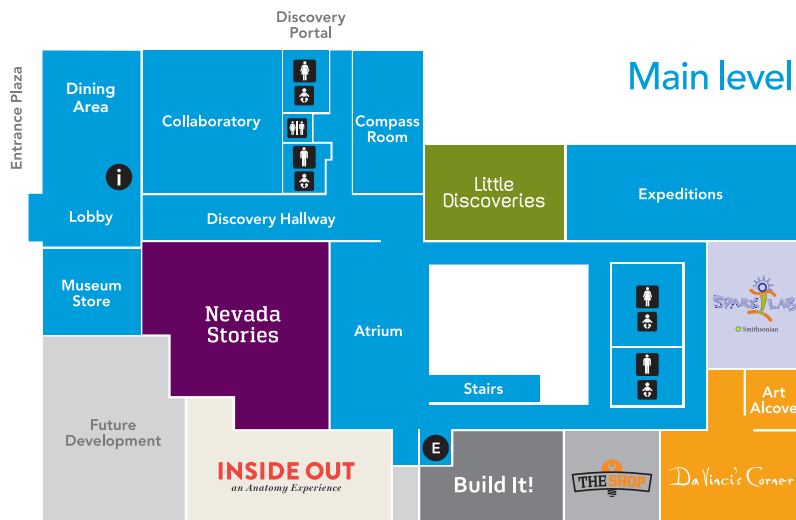

The Discovery's youngest visitors will find this gallery to be an engaging place to climb, explore and, best of all, cooperate. They can operate an ore cart and mine elevator, explore a cave, and even climb a tree!

Cloud Climber & Truckee Connects

Climb three stories high into this model of our region's water cycle and then explore a scale model of the Truckee River—from Lake Tahoe all the way to Pyramid Lake.

Under the Stars

Explore a cave, pitch a tent, and interact with wildlife from throughout our great state. Under the Stars is a Nevada outdoor experience brought inside.
