

Sshhhh! This new exhibit is a secret!

Every science museum needs a collection of classic experiences. Exhibits that are fun and familiar, but still give visitors that ah-ha moment each and every time. The Discovery is embarking on a fundraising effort to bring a new ah-ha inducing experience to the plaza outside the museum—a pair of Whisper Dishes!

These parabolic dishes will sit opposite each other on the plaza approximately 36 feet apart. Parabola-shaped dishes collect, focus and amplify sound waves. When visitors speak into the dishes, sound waves bounce off the parabolic shape and travel in parallel to the opposite dish. The sound waves reflect to its focal point – where the sound waves converge. If both visitors are at the focal points, they will hear each other loudly and clearly, even if they whisper!

With your support, The Discovery will welcome visitors with this engaging science experience before they even enter the building. In recognition of your support, your name or the name of your business will be prominently displayed on a plaque accompanying this amazing exhibit.
